

## Supporting Letter

April 24<sup>th</sup>, 2022

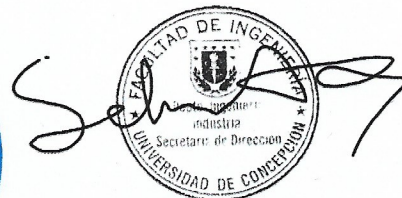

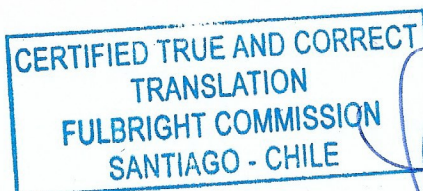

To whom it main concern,

I am pleased to write this supporting letter for Natalia Madrid. She worked with me in the civil industrial engineering program at Universidad de Concepción and reported to me in my position as director of studies. I hereby certify that Natalia was in charge of '*General accounting and industrial costs*' (seventh semester of the curricular program) and '*Economic Engineering*' (eighth semester of the curricular program) from the second semester of 2019 to the first semester of 2021.

As a teacher, Natalia was always qualified by the students as one of the best in the program. On a scale from 1 to 7, her average qualification (from teaching evaluation) through these years was 6.55, which is far above the median and is considered exceptional. In addition, she received outstanding detailed feedback from the students every semester in both courses. Most of them highlight Natalia's dedication, enthusiasm, strong knowledge, and ability to use various teaching techniques in the classroom.

Natalia is a delight to work with since she is a dedicated teacher with the highest capabilities. I would not hesitate to work with her in the future. If you want further elaboration on the aspects exposed here or other related matters with Natalia, do not hesitate to consult me.

Sincerely,

**Sebastián Astroza Tagle**  
**Director of studies**  
Civil Industrial Engineering  
Universidad de Concepción
